

Covers the minimum elements of 29 CFR 1910.39(c). With 10 or fewer employees the plan may be communicated orally.

1. Major fire hazards, how they're handled and controlled

Hazard	Handling and storage	Ignition sources and control	Fire equipment for it
Alcohol-based prep and sanitizer	Closed containers; small amounts in rooms	Let dry before laser or cautery	ABC extinguisher
Oxygen cylinders	Secured upright; away from heat	No flames or sparks nearby	ABC extinguisher
Lasers and energy devices	Key removed when not in use	Standby when not firing; no wet prep	ABC extinguisher; water
Paper, linens, supplies	Stored away from heat sources	Clear of heaters and lamps	ABC extinguisher
Electrical equipment	No daisy-chained power strips	Damaged cords removed	ABC extinguisher

2. Controlling flammable and combustible waste (what, where, how often it's removed)

3. Maintaining safeguards on heat-producing equipment (devices, heaters, lamps, sterilizer)

4. People responsible

Maintains fire equipment and systems (name / title)

Controls fuel-source hazards (name / title)

5. Plan reviewed with each employee (fire hazards they're exposed to)

Employee	Date reviewed	Employee initials	Reviewed by

Approved by: _____ Date: _____ Next review: _____
